DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-3, 5-8 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Vangarde (5,504,812).

Vangarde discloses a headphone support element (24) for securing a headphone connector ^{v2}(24) to a headphone connector interface (26) on an electronic device (12) where headphone having a first receptacle (the receptacle or the space for the tang or the leaf spring portion) and a second receptacle (the rectangular housing for the wires).

3. Claims 1, 4-5 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Shurman et al (6,091,832).

Shurman et al discloses a headphone support element (58, 60) made of elastic material and for securing a headphone connector (88) to a headphone connector interface on an electronic device (the headset).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shurman.

Regarding claim 10, Shurman further discloses a hole and a screw (62 and 64) for mounting the headphone types support to the electronic device. Therefore fails to teach a threaded hole. Connections between side support members and the head supports using threaded hole are well known in the art of headphones. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a thread hole in place of the hole in Shurman for an improved coupler.

Allowable Subject Matter

6. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
